

Biographical Sketch

Mostafa Rezaali
NSF AGS-PRF Application

Biographical Sketch Common Form

Name: Mostafa Rezaali

Position Title: Graduate Research Assistant and Ph.D. Candidate

Organization: University of Florida

Source basis: Prepared from SciENcv record 2685636 visible content and local CV publication details. The SciENcv page lists the University of Florida Ph.D. preparation entry, University of Florida appointments, and an empty related-products table; products below are therefore populated from the CV for completeness.

A. Professional Preparation

Organization	Location	Degree / Training	Field / Date
University of Florida	Gainesville, Florida	Doctor of Philosophy	Department of Geography, Aug 2026
University of Florida	Gainesville, Florida	Graduate Certificate	Atmospheric Sciences
Qom University of Technology	Qom, Iran	M.Sc.	Civil and Environmental Engineering, 2018
IAUKHSH	Isfahan, Iran	B.Sc.	Civil and Environmental Engineering, 2016

B. Appointments and Positions

Dates	Title	Organization / Department	Location
2022–2026	GRA	University of Florida	Gainesville, Florida
2022–Present	Graduate Research Assistant (PhD Candidate)	University of Florida, Department of Geography	Gainesville, Florida
2025	NSF LEAP REU Mentor	University of Florida	Gainesville, Florida
2025	Invited Lecturer, Deep Learning Applications in Climate Science	University of Florida	Gainesville, Florida
2025	Invited Lecturer, Climate Change Impacts on Future Plant Distributions	University of Florida	Gainesville, Florida
2021–Present	M.Sc. Student Advisor	Alborz University of Medical Sciences	Iran

C. Products

Lead-authored products related to the proposed project, sorted by date.

1. Rezaali, M., Fouladi-Fard, R., O'Shaughnessy, P., Naddafi, K., and Karimi, A. (2025). Assessment of AERMOD and ADMS for NO_x dispersion modeling with a combination of line and point sources. *Stochastic Environmental Research and Risk Assessment*.
2. Rezaali, M., Jahangir, M. S., Fouladi-Fard, R., and Keellings, D. (2024). An ensemble deep learning approach to spatiotemporal tropospheric ozone forecasting: A case study of Tehran, Iran. *Urban Climate*, 55, 101950.
3. Rezaali, M., Fouladi-Fard, R., and Karimi, A. (2023). Performance of TANN, NARX, and GMDHT models for urban water demand forecasting. *Avicenna Journal of Environmental Health Engineering*, 10(2), 85–97.
4. Rezaali, M., Quilty, J., and Karimi, A. (2021). Probabilistic urban water demand forecasting using wavelet-based machine learning models. *Journal of Hydrology*, 600, 126358.
5. Rezaali, M., Fouladi-Fard, R., Mojarad, H., Sorooshian, A., Mahdinia, M., et al. (2021). A wavelet-based random forest approach for indoor BTEX spatiotemporal modeling and health risk assessment. *Environmental Science and Pollution Research*, 28, 22522–22535.

Other significant products.

1. Narayanan, A., Rezaali, M., Bunting, E. L., and Keellings, D. (2025). It's getting hot in here: Spatial impact of humidity on heat wave severity in the U.S. *Science of The Total Environment*, 963, 178397.
2. Farajollahi, M., Fahiminia, M., Fouladi-Fard, R., Rezaali, M., and Sorooshian, A. (2024). Human and ecological health-risk research related to environmental exposure.
3. Rezaali, M., and Fouladi-Fard, R. (2021). Aerosolized SARS-CoV-2 exposure assessment: dispersion modeling with AERMOD. *Journal of Environmental Health Science and Engineering*, 19, 285–293.
4. Rezaali, M., Fouladi-Fard, R., and Karimi, A. (2020). Identification of temporal and spatial patterns of river water quality parameters using NLPCA and multivariate statistical techniques. *International Journal of Environmental Science and Technology*, 17, 2977–2994.
5. Rezaali, M., and Karimi, A. (2019). Decentralized wastewater treatment plants site selection of Qom Province using environmental and spatial criteria.

D. Synergistic Activities

1. Mentored emerging climate-data scientists through NSF LEAP REU activities and student research advising.
2. Delivered invited instruction on deep learning applications in climate science and climate-change impacts.
3. Developed interdisciplinary AI workflows for climate, hydrology, air quality, and environmental health.
4. Provided peer-review service for journals including *Scientific Reports*, *Journal of Hydrology*, and *Springer Nature Applied Sciences*.
5. Built reproducible Python, MATLAB, R, and geospatial workflows for large climate and environmental datasets.

Eligibility and Certification Context

Mostafa Rezaali is a Ph.D. candidate applying as an early-career researcher transitioning from doctoral training to postdoctoral research and does not hold a tenure-track or equivalent permanent research position. The Ph.D. preparation entry in SciENcv lists University of Florida, Department of Geography, with expected receipt in August 2026. The final submission should confirm the exact degree timeline and use the certified SciENcv export if Research.gov requires SciENcv certification.
